

## SOME TYPES ON COACHES

Travelers in the West and Their Talk.

TWO MOUNTAIN GIRLS

One Man Who Knew All About the Egg Business.

For two young, unchaperoned girls to sit on the steps of a jolting, narrow-gauge car, throw peaches down at one that yawned a thousand feet below, and cry out easily to the section men standing back stiffly against the mountainside as the train rushes past, may not be the conventional or prudent thing. But it is fun for the girls. And if the way from Silverton to Pueblo, Colo., is long and the charm of a "yellowback" is better, who can say what may amuse two vigorous mountain maidens?

The wore tall, atop a little too much for grace and a little too long. One was dark, with some distant suggestion of French; the other with her wild blue eyes and light hair fitted the Celtic name crudely littered on the cover of "Hearts and the Moth." The observant traveler, two seats away, coming up from New Mexico, was alone. He felt the redness of the slow climb up to the ten-thousand feet summit and the zigzag descent. He saw look on the melancholy crest of resignation, and he laughed at himself when a hand-glass, which the light-haired girl openly manipulated, showed him a scrap of his gloom. The girl with the glass saw the traveler's face change in the mirror, and, turning to her sister, pointed it out. Then for a minute or two studied the traveler in the glass.

Evidently the man could be trusted. The dark, graver girl turned around and held out a bag of delicious peaches. The traveler ate a peach and asked for "a second." "Where do they grow?" he queried.

"In the San Juan valley," answered the dark girl. "You must like them," she added. The traveler thought them good, said so, and then told of his recent jaunt down the valley to the Chama and into the Gallatin Mountains.

"Don't they raise peaches down there?" the blonde questioned. The other cut in to say that she had heard that the Mexicans raised fruit. "They're too trifling to tend fruit trees," she explained. The traveler thought that New Mexico would soon wake up and develop fruit.

"There's a ditch down near Silverton," said the light-haired girl. "I've followed it down for ten miles, but I didn't find any farms or peaches. So I quit it."

"They ship the fruit in from the San Juan valley—lots of it comes up to the mines," the dark girl answered that the traveler had reached the age when practical economies would be interesting.

The train had passed over the summit, had exchanged its two hard-breathing little engines for one that sighed easily as it slid around the multitude of curves, only a thin cloud of white smoke floating from its stack. The traveler was still shivering in the unaccustomed chill of the mountain-top when the dark girl, leaning far out of the open window, suddenly exclaimed:

"Come on, let's go out to the platform and get some fresh air!" She was dressed in some very thin, half-lace material but her face was flushed. "If you want some more peaches you'll have to come, too. The blonde held the paper bag towards the traveler. He followed, to sit far back, hunched a broken-down white horse clattered down to the next station. "Here they eat, eating bits of the paper bag, scraps of peach-bins, and quick bursts of song to whatever wild things that lived in the gulches. Now and then one would lean out, catch the rush of wind in her hair, then crouch back laughing. The blonde, merry-faced brackman passed once, leaning over to shout a caution warning to the girls, and went on smiling at the defiant tone of the answer. The traveler did not warn them, for he saw the firm security of their apparently dangerous seat.

The observant traveler shivered for a minute, sat politely ten minutes longer, then tied back to the car. He closed the windows that had been opened near his seat, and rubbed his stiffened limbs. After a time the girls came in. The dark sister crowded close to the reopened window and took the blonde head on her shoulder. They snuggled like two small children. The traveler sat back, his collar turned up to his ears, wondering anew at the capability and the practical sanity of those mining-town women. He could have guessed that their aunt in Pueblo would wait contentedly until the two climbed out, stiff and sleepy, at two o'clock of a chilly summer morning. They laid a very pleasant good-bye as they left the car, the blonde crumpling the empty paper bag in her hand. The observant traveler that the San Juan peaches had been eaten.

The civil engineer had a searching eye. He wanted to talk to some one. The observant traveler had opened a newspaper when he came into the smoking compartment, and was staring a huge picture of Gov. Taft, reading scattered scraps of news as to the progress of negotiations of the Philippine fruits question. The civil engineer took the picture with his eye, glanced around to discover who would listen, and addressed the traveler:

"I was out there for two years."

"In the Philippines?" the traveler questioned politely.

"Yes, sir, one year in the 4th Colorado Volunteers, then a year in the Government engineering service." He stopped to let the statement sink in. Then, one of the smokers had made their newspapers and hunched around to face the speaker. The Colorado Express was sickling across the plain west of Dodge City. The civil engineer was in his shirt-sleeves, and his shoes were off. He had slept through from Kansas City on the leather-covered long seat of the smoker. He had taken his customary stimulant already; he opened his bag to offer the traveler.

"I always had a little of that good stuff on hand in the Philippines," he explained. "A man's simply got to look after himself over there. Of course, I never take it to excess—you can do it in that climate. That isn't an unhealthy country at all when you can take care of yourself. The trouble is that the fellow's a limit to everything." The words came out in a half-exclamatory tone. The observant traveler twisted a bit, as if to secure the

full force of the speech, hoping to draw his fellow-passengers into the discussion.

A fat, red-faced man asked:

"Well, do you think that the friars have made us much trouble over there as they say?" The traveler was glad to get away from the searching eye for a moment. There was a certain aggressive light in his face as he answered:

"The Philippines want to get 'em out, I can tell you that. The way I size it up—"

The rest had the familiar tone of editorial comment. Now, the observant traveler suspected that, back of the dictatorial voice and the aggressive eye, there were experiences full of the human interest, colorful.

Breakfast at a station in fields of melons that dotted over the irrigation ditches two hours more across sage-brush, the Arkansas River fading into the rear, a late green streak, and Pueblo was called.

Two weeks later when the traveler came back from his New Mexico experience he found the surveyor gazing into the window of one of Pueblo's brilliant hat stores. There was the hearty hand grip, the ready invitation to "come and take something," the quick confidence of an old friend in the surveyor's manner.

The surveyor went to lunch with the traveler. He confessed naively that he had become homesick in Pueblo, for his friend was busy and the city's resources in the summer were not great for one seeking diversion. Experimentally, the traveler began to speculate as to the Western plans of the Rock Island railroad. The surveyor really didn't know about that. The work was done to the west of New Mexico. Whether the road would push on through, striking north of Santa Fe, he could not even guess. Yes, he knew there was an easy pass across the "divide," northeast of Vegas, and he had heard that two or more surveys had been made through there. No, he couldn't tell what point on the Pacific Coast the road was making for. But, come to think of it, the San Juan valley had no road. The traveler was right about that; then there was a promising route up towards Salt Lake City. He couldn't really say anything because he didn't know.

As the traveler switched to the latest phase of the Philippine friars negotiations, he decided that this valuable surveyor, the restless soldier, the shifting subordinate in the industrial struggle of the West, had his reserves. The business of his employer, little more than a vague, corporate shadow, was his business, and the knowledge of it his own.

"We got 100,000 dozen eggs every week," the traveler overheard the thin, dark-mounted man say. The figures seemed overwhelming. The traveler calculated. That would mean 6,000,000 eggs and how many hens? Would every hen that contributed to this huge egg combine lay every day? Well, suppose each took one day of every week, then a round million of hens would be required to furnish all these eggs. What kind of a ranch had this man? There must be square miles of chickens. After a time the traveler ventured to ask:

"Do you raise all your eggs?" The thin man laughed and the traveler joined in:

"Have one on me," chuckled the egg raiser. He handed over a slim, fragrant egg, and let the surveyor to the smoker. "Just wait here a minute," he added, as he raced back to his seat in the sleeper. He reappeared with a yellow-labeled tin can, six inches high and three square.

"See this?" he queries. The traveler took the can. "There are five dozen eggs in there. Here, I'll show you." The top was screwed off. "Dedicated!" he exclaimed. The traveler sat stupefied, wondering.

"You've got a special breed of hens?" The traveler tried to keep his face grave as he spoke. But there was another charge of merriment. The thin man quietly explained:

"We got so many more eggs at our principal depot in St. Louis that we can't dispose of them here. So we put up a factory for drying them and pre-cooking them. At the price is way down and our branch houses are sending in the big summer crops of eggs we simply turn the surplus over to the factory and they dehydrate them. We sell this can for seventy-five cents in winter. Used for baking purposes, sent to Alaska, the Philippines, China, five dozen of eggs in this little can, at fifteen cents a dozen."

"How wonderful!" the traveler said. The thin man smoked furiously and described something of the present—all but the "secret part." From Kansas City down to Parsons, with the rank Kansas cowboys flashing by, the dedicated egg enthusiast talked.

He had begun life an errand boy in a New York provision store. He had grown up to a partnership, to ownership, to a comfortable life that established branch houses at St. Louis, Kansas City, Denver and simply depots at a hundred small towns. A partner was awaiting his return to New York. He would go down to his partner's country house for a month or two. So he rattled on. Ten minutes before he left the train at Parsons he gave the traveler a handful of the dedicated eggs to taste, adding another of the next carriage.

"Well, be good," he called as he sprung down from the steps. He crossed over to the waiting hotel omnibus, then waved a second farewell to the friendly traveler.

JOHN M. OSKISON.

Triumph

A sense of triumph filled his breast and gladdened his eyes. He had not done his best. The world behind him did not nod in vain. To be high that others sought in vain. He had not been appointed wiser. The honors he had hoped to gain were far away. His fame had reached to distant climes; he had not carved his name right on the walls of time. He had not won in love or in the mart, but gladdened his heart. One who was poor and weak. Craved when he frowned and ran. To do his bidding when he deigned to speak.

He was the master of the weaker man—and one who said him may say dry. Came humbly every week. To draw her husband's money pay.

S. E. KISER.

Stay With Missouri Moral.

A Missouri farmer has made a serious mistake in exposing himself to the glare of a heartless world. He saw an advertisement of a "two-dollar fire escape," and the more he looked at the advertisement the more he wanted the fire escape.

"I can't let a bargain like that go on my hands," he murmured through his tangled whiskers. And then he set down and pulled a two-dollar bill.

In due time the fire-escape arrived. It was an inexpensive copy of the Bible—(Cleveland Plain Dealer).

Mr. Reed, Mr. Wright, Mr. Sypher, and the elevator of a Portland, Ore., building the other day.

## Eagle Table and Kitchen

Suggestions What to Eat

And How to Prepare Food.

These articles on the necessary subjects of food are here for the benefit of those who are interested in preparing and based on knowledge of chemistry as applied to cooking and practical information derived from actual experience.

### GREEN TOMATOES.

When falling leaves and slow dropping leaves proclaim that the season of mist and mellow fruitfulness is here, the housewife takes a careful inventory of the stock of good things she has stored in her preserve closet to make quite sure she has all the favorite preserves, jellies, jams, pickles, etc., that will grace the palates of the different members of her family when desolate winter succeeds kindly autumn's glorious plenty.

Except for the apple trees, which for some time yet will be filled with fruit, russet and scarlet and yellow and ripe to the core, most of our summer products from tree and vine will soon be touched with autumn's frost, and if not killed outright will ripen slowly and imperfectly at best. The first frosts are apt to come while the tomato vines are still laden with well developed, but green fruit, and in order to save these from the frost-blight one may resort to numerous ways and means. Those who grow their own when they take them up root and branch, proceeding then to have a rather dark and not too dry a cellar. Hang the vines up by the roots so the vines will not touch the ground. In many a farm house cellar vines filled with fine green tomatoes have been treated in this manner and preserved until very late in the autumn. One usually associates green tomatoes with pickles only, but while these are the commonest variety of pickles, there are other ways of utilizing them.

**Fried Green Tomatoes.—No. 1.** Select smooth, round tomatoes of uniform size; cut them in thin slices and sprinkle with salt. Make a fritter batter with flour, water, egg, butter, pepper and salt. Dip each slice of tomato into the batter then fry in sufficient hot fat to brown both sides at once. Nice for breakfast served with crisp bacon or poached eggs.

**Fried Green Tomatoes.—No. 2.** Wipe six large green tomatoes with a damp cloth, cut them into slices an eighth of an inch thick, sprinkle the tomatoes with salt and let them stand a few minutes, then press out the juice, dust the slices with a little pepper and sugar, and a little ground ginger; then dip the slices into fine bread crumbs, then into beaten egg, then again in the crumbs. Bake them in butter or dipping and serve with gravy made as follows: Rub two level tablespoonsful of butter with two of flour, to a smooth paste, then put into a saucepan and stir until brown; then add a cup of good meat stock or milk and stir until it thickens; season to taste with salt and a little paprika or Worcestershire sauce. Serve very hot.

**Green Tomato Pie.** Peel and cut green tomatoes in thick slices; then wash in several waters to remove most of the seeds. Butter a baking dish and bring to a boil. To each pound of tomatoes add three-quarters of a pound of sugar and the grated rind of a lemon. Cook all together until thick and tomatoes are clear. Then set aside to get cold. Add the juice of a lemon and bake in a butter crust and stripe of pastry laid across the top like lattice work.

**Green Tomato and Meat Pie.** Slice green tomatoes thin and cover with boiling water; boil for ten minutes; drain. Butter a baking dish and put in a layer of the tomatoes; then season with salt cover with a layer of cold meat, sliced thin, season with salt, pepper and a little table sauce; cover with a layer of very thin slices of buttered bread; then more tomatoes and so on until dish is full, having the top covered with buttered bread. Bake in a hot oven for one hour. Four or five large tomatoes will fill a pie dish and make until a slice brown.

**Preserved Green Tomatoes.** Take small green tomatoes, wash, cover with boiling water and boil until the skins loosen; then peel and drain. Take equal weight of granulated sugar and make a syrup with water and the juice of a lemon and a few bits of stick cinnamon. Put in the tomatoes and cook gently until they are tender and clear. Instead of the cinnamon, green ginger root and lemon sliced may be used.

**Tomato Manges.** Select round, smooth tomatoes for this pickle. With a sharp knife cut an slice from the stem end, large enough to allow you to remove the seeds, taking care that you do not break the outside of the tomato. After all the seeds are taken out, stand the slices in water for an hour, then drain. Sprinkle with a little salt and a little vinegar. Put a tablespoonful of sugar and two whole cloves in each tomato; an sprig with the filling. Fill the pieces on each mango and seal with a white thread or fasten by wrapping a string around the mango. Pack them in stone jars or large mottled glass jars and cover them with hot cider vinegar, sweetened with a pound or more of sugar to each gallon of vinegar, according to taste. If a few bits of horseradish root are placed on top of each jar the mangoes will keep better.

**Green Tomato Butter.** Select green tomatoes that are just grown, but quite green. Slice them thin. Make a syrup in proportion of one pound of sugar to two pounds of tomatoes. Boil down slowly for four hours or until the butter is smooth and thick, stirring frequently to prevent sticking. Flavor with lemon juice.

**Green Tomato Chowchow.** Chop fine one peck of green tomatoes, three onions, six green peppers, apples, lemons, lightly with salt, let stand an hour, then add in the juice. Put three quarts of vinegar in a porcelain-lined kettle with one pint of sugar and a few pieces of horseradish root. Boil for five minutes, add the tomatoes and boil five minutes longer, but do not stir. Pour into dry jars. When dry, add a little salt. When dry, add a little salt. When dry, add a little salt.

**Sour Green Tomato Pickle.** Peel green tomatoes and to each quart add three small cucumbers, one slice of onion, one slice of carrot, one slice of celery, one slice of radish, one slice of turnip, one slice of cauliflower, one slice of cabbage, one slice of lettuce, one slice of spinach, one slice of parsley, one slice of dill, one slice of fennel, one slice of anise, one slice of coriander, one slice of cumin, one slice of mustard, one slice of pepper, one slice of cloves, one slice of nutmeg, one slice of mace, one slice of cinnamon, one slice of ginger, one slice of saffron, one slice of turmeric, one slice of annatto, one slice of cochineal, one slice of carmine, one slice of indigo, one slice of malachite, one slice of verdigris, one slice of cerise, one slice of magenta, one slice of fuchsine, one slice of alizarin, one slice of eosin, one slice of methylene blue, one slice of resorcin, one slice of gentian, one slice of auramine, one slice of methylene green, one slice of fast green, one slice of brilliant green, one slice of malachite green, one slice of cerise red, one slice of magenta red, one slice of fuchsine red, one slice of alizarin red, one slice of eosin red, one slice of methylene blue, one slice of resorcin, one slice of gentian, one slice of auramine, one slice of methylene green, one slice of fast green, one slice of brilliant green, one slice of malachite green, one slice of cerise red, one slice of magenta red, one slice of fuchsine red, one slice of alizarin red, one slice of eosin red, one slice of methylene blue, one slice of resorcin, one slice of gentian, one slice of auramine, one slice of methylene green, one slice of fast green, one slice of brilliant green, one slice of malachite green, one slice of cerise red, one slice of magenta red, one slice of fuchsine red, one slice of alizarin red, one slice of eosin red, one slice of methylene blue, one slice of resorcin, one slice of gentian, one slice of auramine, one slice of methylene green, one slice of fast green, one slice of brilliant green, one slice of malachite green, one slice of cerise red, one slice of magenta red, one slice of fuchsine red, one slice of alizarin red, one slice of eosin red, one slice of methylene blue, one slice of resorcin, one slice of gentian, one slice of auramine, one slice of methylene green, one slice of fast green, one slice of brilliant green, one slice of malachite green, one slice of cerise red, one slice of magenta red, one slice of fuchsine red, one slice of alizarin red, one slice of eosin red, one slice of methylene blue, one slice of resorcin, one slice of gentian, one slice of auramine, one slice of methylene green, one slice of fast green, one slice of brilliant green, one slice of malachite green, one slice of cerise red, one slice of magenta red, one slice of fuchsine red, one slice of alizarin red, one slice of eosin red, one slice of methylene blue, one slice of resorcin, one slice of gentian, one slice of auramine, one slice of methylene green, one slice of fast green, one slice of brilliant green, one slice of malachite green, one slice of cerise red, one slice of magenta red, one slice of fuchsine red, one slice of alizarin red, one slice of eosin red, one slice of methylene blue, one slice of resorcin, one slice of gentian, one slice of auramine, one slice of methylene green, one slice of fast green, one slice of brilliant green, one slice of malachite green, one slice of cerise red, one slice of magenta red, one slice of fuchsine red, one slice of alizarin red, one slice of eosin red, one slice of methylene blue, one slice of resorcin, one slice of gentian, one slice of auramine, one slice of methylene green, one slice of fast green, one slice of brilliant green, one slice of malachite green, one slice of cerise red, one slice of magenta red, one slice of fuchsine red, one slice of alizarin red, one slice of eosin red, one slice of methylene blue, one slice of resorcin, one slice of gentian, one slice of auramine, one slice of methylene green, one slice of fast green, one slice of brilliant green, one slice of malachite green, one slice of cerise red, one slice of magenta red, one slice of fuchsine red, one slice of alizarin red, one slice of eosin red, one slice of methylene blue, one slice of resorcin, one slice of gentian, one slice of auramine, one slice of methylene green, one slice of fast green, one slice of brilliant green, one slice of malachite green, one slice of cerise red, one slice of magenta red, one slice of fuchsine red, one slice of alizarin red, one slice of eosin red, one slice of methylene blue, one slice of resorcin, one slice of gentian, one slice of auramine, one slice of methylene green, one slice of fast green, one slice of brilliant green, one slice of malachite green, one slice of cerise red, one slice of magenta red, one slice of fuchsine red, one slice of alizarin red, one slice of eosin red, one slice of methylene blue, one slice of resorcin, one slice of gentian, one slice of auramine, one slice of methylene green, one slice of fast green, one slice of brilliant green, one slice of malachite green, one slice of cerise red, one slice of magenta red, one slice of fuchsine red, one slice of alizarin red, one slice of eosin red, one slice of methylene blue, one slice of resorcin, one slice of gentian, one slice of auramine, one slice of methylene green, one slice of fast green, one slice of brilliant green, one slice of malachite green, one slice of cerise red, one slice of magenta red, one slice of fuchsine red, one slice of alizarin red, one slice of eosin red, one slice of methylene blue, one slice of resorcin, one slice of gentian, one slice of auramine, one slice of methylene green, one slice of fast green, one slice of brilliant green, one slice of malachite green, one slice of cerise red, one slice of magenta red, one slice of fuchsine red, one slice of alizarin red, one slice of eosin red, one slice of methylene blue, one slice of resorcin, one slice of gentian, one slice of auramine, one slice of methylene green, one slice of fast green, one slice of brilliant green, one slice of malachite green, one slice of cerise red, one slice of magenta red, one slice of fuchsine red, one slice of alizarin red, one slice of eosin red, one slice of methylene blue, one slice of resorcin, one slice of gentian, one slice of auramine, one slice of methylene green, one slice of fast green, one slice of brilliant green, one slice of malachite green, one slice of cerise red, one slice of magenta red, one slice of fuchsine red, one slice of alizarin red, one slice of eosin red, one slice of methylene blue, one slice of resorcin, one slice of gentian, one slice of auramine, one slice of methylene green, one slice of fast green, one slice of brilliant green, one slice of malachite green, one slice of cerise red, one slice of magenta red, one slice of fuchsine red, one slice of alizarin red, one slice of eosin red, one slice of methylene blue, one slice of resorcin, one slice of gentian, one slice of auramine, one slice of methylene green, one slice of fast green, one slice of brilliant green, one slice of malachite green, one slice of cerise red, one slice of magenta red, one slice of fuchsine red, one slice of alizarin red, one slice of eosin red, one slice of methylene blue, one slice of resorcin, one slice of gentian, one slice of auramine, one slice of methylene green, one slice of fast green, one slice of brilliant green, one slice of malachite green, one slice of cerise red, one slice of magenta red, one slice of fuchsine red, one slice of alizarin red, one slice of eosin red, one slice of methylene blue, one slice of resorcin, one slice of gentian, one slice of auramine, one slice of methylene green, one slice of fast green, one slice of brilliant green, one slice of malachite green, one slice of cerise red, one slice of magenta red, one slice of fuchsine red, one slice of alizarin red, one slice of eosin red, one slice of methylene blue, one slice of resorcin, one slice of gentian, one slice of auramine, one slice of methylene green, one slice of fast green, one slice of brilliant green, one slice of malachite green, one slice of cerise red, one slice of magenta red, one slice of fuchsine red, one slice of alizarin red, one slice of eosin red, one slice of methylene blue, one slice of resorcin, one slice of gentian, one slice of auramine, one slice of methylene green, one slice of fast green, one slice of brilliant green, one slice of malachite green, one slice of cerise red, one slice of magenta red, one slice of fuchsine red, one slice of alizarin red, one slice of eosin red, one slice of methylene blue, one slice of resorcin, one slice of gentian, one slice of auramine, one slice of methylene green, one slice of fast green, one slice of brilliant green, one slice of malachite green, one slice of cerise red, one slice of magenta red, one slice of fuchsine red, one slice of alizarin red, one slice of eosin red, one slice of methylene blue, one slice of resorcin, one slice of gentian, one slice of auramine, one slice of methylene green, one slice of fast green, one slice of brilliant green, one slice of malachite green, one slice of cerise red, one slice of magenta red, one slice of fuchsine red, one slice of alizarin red, one slice of eosin red, one slice of methylene blue, one slice of resorcin, one slice of gentian, one slice of auramine, one slice of methylene green, one slice of fast green, one slice of brilliant green, one slice of malachite green, one slice of cerise red, one slice of magenta red, one slice of fuchsine red, one slice of alizarin red, one slice of eosin red, one slice of methylene blue, one slice of resorcin, one slice of gentian, one slice of auramine, one slice of methylene green, one slice of fast green, one slice of brilliant green, one slice of malachite green, one slice of cerise red, one slice of magenta red, one slice of fuchsine red, one slice of alizarin red, one slice of eosin red, one slice of methylene blue, one slice of resorcin, one slice of gentian, one slice of auramine, one slice of methylene green, one slice of fast green, one slice of brilliant green, one slice of malachite green, one slice of cerise red, one slice of magenta red, one slice of fuchsine red, one slice of alizarin red, one slice of eosin red, one slice of methylene blue, one slice of resorcin, one slice of gentian, one slice of auramine, one slice of methylene green, one slice of fast green, one slice of brilliant green, one slice of malachite green, one slice of cerise red, one slice of magenta red, one slice of fuchsine red, one slice of alizarin red, one slice of eosin red, one slice of methylene blue, one slice of resorcin, one slice of gentian, one slice of auramine, one slice of methylene green, one slice of fast green, one slice of brilliant green, one slice of malachite green, one slice of cerise red, one slice of magenta red, one slice of fuchsine red, one slice of alizarin red, one slice of eosin red, one slice of methylene blue, one slice of resorcin, one slice of gentian, one slice of auramine, one slice of methylene green, one slice of fast green, one slice of brilliant green, one slice of malachite green, one slice of cerise red, one slice of magenta red, one slice of fuchsine red, one slice of alizarin red, one slice of eosin red, one slice of methylene blue, one slice of resorcin, one slice of gentian, one slice of auramine, one slice of methylene green, one slice of fast green, one slice of brilliant green, one slice of malachite green, one slice of cerise red, one slice of magenta red, one slice of fuchsine red, one slice of alizarin red, one slice of eosin red, one slice of methylene blue, one slice of resorcin, one slice of gentian, one slice of auramine, one slice of methylene green, one slice of fast green, one slice of brilliant green, one slice of malachite green, one slice of cerise red, one slice of magenta red, one slice of fuchsine red, one slice of alizarin red, one slice of eosin red, one slice of methylene blue, one slice of resorcin, one slice of gentian, one slice of auramine, one slice of methylene green, one slice of fast green, one slice of brilliant green, one slice of malachite green, one slice of cerise red, one slice of magenta red, one slice of fuchsine red, one slice of alizarin red, one slice of eosin red, one slice of methylene blue, one slice of resorcin, one slice of gentian, one slice of auramine, one slice of methylene green, one slice of fast green, one slice of brilliant green, one slice of malachite green, one slice of cerise red, one slice of magenta red, one slice of fuchsine red, one slice of alizarin red, one slice of eosin red, one slice of methylene blue, one slice of resorcin, one slice of gentian, one slice of auramine, one slice of methylene green, one slice of fast green, one slice of brilliant green, one slice of malachite green, one slice of cerise red, one slice of magenta red, one slice of fuchsine red, one slice of alizarin red, one slice of eosin red, one slice of methylene blue, one slice of resorcin, one slice of gentian, one slice of auramine, one slice of methylene green, one slice of fast green, one slice of brilliant green, one slice of malachite green, one slice of cerise red, one slice of magenta red, one slice of fuchsine red, one slice of alizarin red, one slice of eosin red, one slice of methylene blue, one slice of resorcin, one slice of gentian, one slice of auramine, one slice of methylene green, one slice of fast green, one slice of brilliant green, one slice of malachite green, one slice of cerise red, one slice of magenta red, one slice of fuchsine red, one slice of alizarin red, one slice of eosin red, one slice of methylene blue, one slice of resorcin, one slice of gentian, one slice of auramine, one slice of methylene green, one slice of fast green, one slice of brilliant green, one slice of malachite green, one slice of cerise red, one slice of magenta red, one slice of fuchsine red, one slice of alizarin red, one slice of eosin red, one slice of methylene blue, one slice of resorcin, one slice of gentian, one slice of auramine, one slice of methylene green, one slice of fast green, one slice of brilliant green, one slice of malachite green, one slice of cerise red, one slice of magenta red, one slice of fuchsine red, one slice of alizarin red, one slice of eosin red, one slice of methylene blue, one slice of resorcin, one slice of gentian, one slice of auramine, one slice of methylene green, one slice of fast green, one slice of brilliant green, one slice of malachite green, one slice of cerise red, one slice of magenta red, one slice of fuchsine red, one slice of alizarin red, one slice of eosin red, one slice of methylene blue, one slice of resorcin, one slice of gentian, one slice of auramine, one slice of methylene green, one slice of fast green, one slice of brilliant green, one slice of malachite green, one slice of cerise red, one slice of magenta red, one slice of fuchsine red, one slice of alizarin red, one slice of eosin red, one slice of methylene blue, one slice of resorcin, one slice of gentian, one slice of auramine, one slice of methylene green, one slice of fast green, one slice of brilliant green, one slice of malachite green, one slice of cerise red, one slice of magenta red, one slice of fuchsine red, one slice of alizarin red, one slice of eosin red, one slice of methylene blue, one slice of resorcin, one slice of gentian, one slice of auramine, one slice of methylene green, one slice of fast green, one slice of brilliant green, one slice of malachite green, one slice of cerise red, one slice of magenta red, one slice of fuchsine red, one slice of alizarin red, one slice of eosin red, one slice of methylene blue, one slice of resorcin, one slice of gentian, one slice of auramine, one slice of methylene green, one slice of fast green, one slice of brilliant green, one slice of malachite green, one slice of cerise red, one slice of magenta red, one slice of fuchsine red, one slice of alizarin red, one slice of eosin red, one slice of methylene blue, one slice of resorcin, one slice of gentian, one slice of auramine, one slice of methylene green, one slice of fast green, one slice of brilliant green, one slice of malachite green, one slice of cerise red, one slice of magenta red, one slice of fuchsine red, one slice of alizarin red, one slice of eosin red, one slice of methylene blue, one slice of resorcin, one slice of gentian, one slice of auramine, one slice of methylene green, one slice of fast green, one slice of brilliant green, one slice of malachite green, one slice of cerise red, one slice of magenta red, one slice of fuchsine red, one slice of alizarin red, one slice of eosin red, one slice of methylene blue, one slice of resorcin, one slice of gentian, one slice of auramine, one slice of methylene green, one slice of fast green, one slice of brilliant green, one slice of malachite green, one slice of cerise red, one slice of magenta red, one slice of fuchsine red, one slice of alizarin red, one slice of eosin red, one slice of methylene blue, one slice of resorcin, one slice of gentian, one slice of auramine, one slice of methylene green, one slice of fast green, one slice of brilliant green, one slice of malachite green, one slice of cerise red, one slice of magenta red, one slice of fuchsine red, one slice of alizarin red, one slice of eosin red, one slice of methylene blue, one slice of resorcin, one slice of gentian, one slice of auramine, one slice of methylene green, one slice of fast green, one slice of brilliant green, one slice of malachite green, one slice of cerise red, one slice of magenta red, one slice of fuchsine red, one slice of alizarin red, one slice of eosin red, one slice of methylene blue, one slice of resorcin, one slice of gentian, one slice of auramine, one slice of methylene green, one slice of fast green, one slice of brilliant green, one slice of malachite green, one slice of cerise red, one slice of magenta red, one slice of fuchsine red, one slice of alizarin red, one slice of eosin red, one slice of methylene blue, one slice of resorcin, one slice of gentian, one slice of auramine, one slice of methylene green, one slice of fast green, one slice of brilliant green, one slice of malachite green, one slice of cerise red, one slice of magenta red, one slice of fuchsine red, one slice of alizarin red, one slice of eosin red, one slice of methylene blue, one slice of resorcin, one slice of gentian, one slice of auramine, one slice of methylene green, one slice of fast green, one slice of brilliant green, one slice of malachite green, one slice of cerise red, one slice of magenta red, one slice of fuchsine red, one slice of alizarin red, one slice of eosin red, one slice of methylene blue, one slice of resorcin, one slice of gentian, one slice of auramine, one slice of methylene green, one slice of fast green, one slice of brilliant green, one slice of malachite green, one slice of cerise red, one slice of magenta red, one slice of fuchsine red, one slice of alizarin red, one slice of eosin red, one slice of methylene blue, one slice of resorcin, one slice of gentian, one slice of auramine, one slice of methylene green, one slice of fast green, one slice of brilliant green, one slice of malachite green, one slice of cerise red, one slice of magenta red, one slice of fuchsine red, one slice of alizarin red, one slice of eosin red, one slice of methylene blue, one slice of resorcin, one slice of gentian, one slice of auramine, one slice of methylene green, one slice of fast green, one slice of brilliant green, one slice of malachite green, one slice of cerise red, one slice of magenta red, one slice of fuchsine red, one slice of alizarin red, one slice of eosin red, one slice of methylene blue, one slice of resorcin, one slice of gentian, one slice of auramine, one slice of methylene green, one slice of fast green, one slice of brilliant green, one slice of malachite green, one slice of cerise red, one slice of magenta red, one slice of fuchsine red, one slice of alizarin red, one slice of eosin red, one slice of methylene blue, one slice of resorcin, one slice of gentian, one slice of auramine, one slice of methylene green, one slice of fast green, one slice of brilliant green, one slice of malachite green, one slice of cerise red, one slice of magenta red, one slice of fuchsine red, one slice of alizarin red, one slice of eosin red, one slice of methylene blue, one slice of resorcin, one slice of gentian, one slice of auramine, one slice of methylene green, one slice of fast green, one slice of brilliant green, one slice of malachite green, one slice of cerise red, one slice of magenta red, one slice of fuchsine red, one slice of alizarin red, one slice of eosin red, one slice of methylene blue, one slice of resorcin, one slice of gentian, one slice of auramine, one slice of methylene green, one slice of fast green, one slice of brilliant green, one slice of malachite green, one slice of cerise red, one slice of magenta red, one slice of fuchsine red, one slice of alizarin red, one slice of eosin red, one slice of methylene blue, one slice of resorcin, one slice of gentian, one slice of auramine, one slice of methylene green, one slice of fast green, one slice of brilliant green, one slice of malachite green, one slice of cerise red, one slice of magenta red, one slice of fuchsine red, one slice of alizarin red, one slice of eosin red, one slice of methylene blue, one slice of resorcin, one slice of gentian, one slice of auramine, one slice of methylene green, one slice of fast green, one slice of brilliant green, one slice of malachite green, one slice of cerise red, one slice of magenta red, one slice of fuchsine red, one slice of alizarin red, one slice of eosin red, one slice of methylene blue, one slice of resorcin, one slice of gentian, one slice of auramine, one slice of methylene green, one slice of fast green, one slice of brilliant green, one slice of malachite green, one slice of cerise red, one slice of magenta red, one slice of fuchsine red, one slice of alizarin red, one slice of eosin red, one slice of methylene blue, one slice of resorcin, one slice of gentian, one slice of auramine, one slice of methylene green, one slice of fast green, one slice of brilliant green, one slice of malachite green, one slice of cerise red, one slice of magenta red, one slice of fuchsine red, one slice of alizarin red, one slice of eosin red, one slice of methylene blue, one slice of resorcin, one slice of gentian, one slice of auramine, one slice of methylene green, one slice of fast green, one
